

## **Part for Clamp Forklift**

Clamp Forklift Parts - Normally used as lift truck accessories in chemical and petroleum businesses, the Drum Clamp, are particularly meant for the safe handling of regular 55-gallon drums. These attachments greatly enhance production for the reason that they are capable of handling up to 4 drums for each load.

Drum Clamps could even be utilized in the food processing and packaging trade or anywhere there is need to store or handle drums. This kind of clamp enables the individual operating it to grab the drums in a secure way for transport and can very much increase operator productivity. While attempting to handle drums utilizing typical lift truck blades, much instability occurs while braking and cornering. This common setback can really be handled safely and proficiently by utilizing the Drum Clamp attachment instead.
