

## PowerBoss Part

PowerBoss Parts - The first vacuum cleaners were invented during the 1860's. Fortunately, floor cleaning equipment and scrubbers have significantly changed since that time. Daniel Hess made the very first carpet sweeper in Iowa, USA. His version had a rotating brush along with an elaborate arrangement of bellows located on top to produce suction. We are lucky these days that scrubber machines and vacuum cleaners require much less effort to operate and are electrically powered.

### The 4 Key Types of Floor Scrubber

Currently, obtainable on the market are four different types of floor scrubbing machines. Every equipment comes with their very own special features and ability to perform certain tasks making them ideal for different work environments and market sectors. Various models are battery operated, several are compact and can be easily packed away and kept, some models are a ride-on kind. The standard model is where the operator walks behind the machine and guides it all-around the area that requires scrubbing. There are also floor scrubbing equipment capable of cleaning big sections all on their own as they have a computer or artificial mind. These automatic models can be programmed to run without a worker.

#### 1. Fold-away Floor Scrubbers

The fold-away scrubber is perfect for small work areas with a limited amount of area. Floor cleaning equipment and vacuums are usually tucked away into storage places and small cupboards. This is when the folding equipment style comes in handy. With this sort of floor scrubber, the main arm that is used to maneuver the machine can be folded in several places, making the machinery compact if it is not being used.

#### 2. Mains & Battery Operated

Although Mains operated floor scrubbers are the most common, the battery operated model is well suited for environments where the obtainable utility sockets are some distance away from the floor which requires scrubbing and extended power leads are not available. The battery operated version is ideal for small places like washrooms with hard to reach areas which will be hard to clean with a trailing power lead. The battery could be charged and used for about 4 hours previous to re-charging is required. The battery could even be replaced if needed.

#### 3. Ride-on or Walking machines

The ride-on machine is a great alternative if the floor scrubber you require is for large areas like for example retail interiors or inside of warehouses. This version allows the operator to maneuver the machinery around obstructions and corners efficiently and easily because the driver has a good vantage point. These types of floor scrubbing equipment come equipped with a two hundred fifty liter water tank and an equivalent container to gather the filthy water. Walking devices are similar products which can be operated by anybody walking behind the machine and steering the scrubber.

#### 4. Robotic Floor Scrubber devices

A robotic floor scrubber could be another option to consider. These versions are ideal if you need a high specification floor scrubber to clean a big environment that has minimum obstructions. These designs have sensors installed to allow the machinery the ability to steer clear of walls, stairs, humans and doors. It can accomplish the cleaning job easily when you start the unit up and set the program, it will clean all by itself. These floor scrubbers are capable of cleaning one thousand square feet with each 4 hour charge.

### Floor Scrubbing Technology

There are a variety of floor scrubber products accessible on the market these days with unique features and selling points. Businesses could keep their floors clean by finding the model that best suits their requirements.

To summarize, the foldable scrubber is best for accessing unreachable and small places like for instance the washrooms, while the ride-on version of floor scrubber could provide the worker with a lot more visibility and comfort. Furthermore, ride-ons are capable of cleaning many hours without a refill or recharge. Robot models allow the cleaning to happen all by itself, enabling folks to carry out tasks elsewhere. Battery operated floor scrubbers are perfect for cleaning locations far away from power sockets. These models have the additional advantage of not getting the power lead twisted all-around door frames or under the machine.
